**RESTRICTION/ ELECTION**

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-41 and 104-144, drawn to the Integrated Photonic Electronic Circuit, classified in class 385, subclass 14.
- II. Claims 42-103, drawn to process of making/designing integrated electronic/photonic circuit using semiconductor material, classified in class 438, subclass 29.

The inventions are distinct, each from the other because:

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the claimed integrated photonic circuits can be made using a variety of different methods/designs such as dopant diffusion, chemical vapor deposition, photolithography, computer aided design and other semiconductor masking techniques.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
